

Is your child having trouble in school? They can't fit in? It's too hard? They don't want to go? Find it boring? They are a square peg trying to fit into a round hole.

People with multiple exceptionalities and anyone with high anxiety are more likely to become frustrated and get into trouble. They want so desperately to fit in. These people are ready to take on the world. We need to guide them. They are the *Stars of Tomorrow* and the future Entrepreneurs of our country. They have a place in the world and it is Centre Stage!

Diane Dupuy, C.M., founder of Famous PEOPLE Players, member of the Order of Canada and EY Social Entrepreneur has founded a new and exciting mission for our young people.

Changing Education

Famous PEOPLE Players' full-day yearly program for high school students is our out-of-the-box classroom for students who tend to fall between the cracks of the regular system.

The "*Stars of Tomorrow*" is designed to help students succeed in a faster, more fun and inspiring manner, preparing them for everyday life and the career path of their choice.

Between theatre sessions where they help to create a show and with culinary tasks to learn how to be a chef, this training will help our young people fulfill their dreams. The magic of theatre will not only show them that there are no boundaries, but also how to be quick on their feet. Shakespeare said "The world is a stage" and yes, everyone has a part! No matter who they are. They are the world's Entrepreneurs who – through their passion and dreams – will make this world a better place.

Nothing stops Entrepreneurs because their passion makes their adrenaline soar.

Before they get into trouble, let them discover the "new drug" of Passion, Possibilities and Purpose for life. **They will triumph!**

Get their autographs now before it's too late because they are.... ***The Stars of Tomorrow.***
